

According to Cyber Security experts email phishing attacks are at an all-time high. These emails are designed to trick the recipient into clicking on a link in the email that will then take them to a website and ask them to provide personal information. Don't be fooled by these emails!

As a resident of Grimes County, you may have recently received an email that looks like an official email coming from Grimes County or the Sheriff's Department. These are email phishing attacks and they were not sent by any Grimes County office. Any official correspondence from the County will be delivered via US Postal Service. If you receive one of these emails and you have suspicions that it is fake or not official, please delete it immediately.

Here at the Grimes County we are working hard to ensure that the Grimes County Government Offices as well as the Sheriff's departments are protected against these threats.
